

Full-Stack Developer (f/m)

We are an ambitious StartUp based in **Magdeburg** and a pioneer in the field of **Augmented Reality**. Started in 2014 with a newly developed technology, we are currently working with 13 employees on many exciting projects with nationally and internationally well-known customers and partners. We want to increase our number of employees considerably and are currently looking for a committed **full-time** employee to support our development team.

Your tasks:

- You independently develop new **high-quality web backend and frontend systems** with **node.js, express.js and Angular**
- As an **active co-designer of our applications**, you will contribute to development proposals on your own initiative and responsibility

Your qualifications:

- Successfully completed studies in **computer science** or in comparable subject area
- Experience in web development with **node.js and express.js**
- Knowledge in the development and connection of REST-APIs
- Solid knowledge in **HTML5, CSS3, JavaScript, SQL**
- Good knowledge of **responsive web design, AJAX based web development, jQuery, Bootstrap**
- First experiences with **web server technologies** like Apache and nginx
- Feeling for functional and user-oriented design and its technical implementation
- Very good knowledge of German and/or English

That's what we offer you:

- Small teams with flat hierarchies and a **StartUp** spirit
- **Flexible working hours** and competitive salary
- **Ideal development opportunities** through a steep learning curve
- Respect and support
- Diversity of people, opinions and experiences
- **Great team atmosphere**, office in central location with good transport connections, free coffee and snacks

We look forward to receiving your application or questions about the advertised position by e-mail to **jobs@3dqr.de**.
