

# Angular Frontend Developer (m/w/d)

3DQR is an up-and-coming start-up based in **Magdeburg** and a pioneer in the field of augmented reality. Started in 2014 with a newly developed strategy, we are currently working on many exciting projects with nationally and internationally known customers and partners. We want to increase our staff and are currently looking for a dedicated full-time employee to strengthen our development team.

## Your tasks :

- Technical conception and new development of Responsive Web-Apps with JavaScript / TypeScript and Angular
- Further development and conception of existing frontend architectures
- As an active co-creator of our applications, you contribute development proposals on your own initiative and responsibility
- You work closely with UX designers and backend developers in an agile development team and using agile methods

## Your qualifications:

- Several years of experience in developing web applications with HTML, CSS and JavaScript/TypeScript
- Very good knowledge in Angular2+
- Secure handling in Responsive Web Design, development tools of current web technologies and microservices
- Experience in connecting service interfaces (REST / OData / GraphQL / Postman)
- Good understanding of build processes, CI/CD, testing and backend technologies
- Knowledge in the connection and use of REST-APIs, Postman
- Very good english knowledge

## That's what we offer :

- Small teams with flat hierarchies and StartUp-Spirit
- Independent work and room for own ideas in a dynamic and creative team with challenging tasks
- Flexible working hours and competitive salary
- Diversity of people, opinions and experiences
- Great team atmosphere, office in central location with good traffic connections
- Benefits like free fruit, coffee, tea and snacks

We look forward to receiving your application or questions about the advertised position by e-mail to [jobs@3dqr.de](mailto:jobs@3dqr.de).
